

The Brain AIOS — High-Potential Lead Contact Book & Sales Pipeline

June 1, 2026

The Brain AIOS — High-Potential Lead Contact Book & Sales Pipeline

Compiled: June 2026 **Target Profile:** Early-stage startup founders, solo entrepreneurs, and SME operators (1–20 employees) actively using fragmented SaaS stacks who would benefit from a proactive AI operating system. **Pipeline Goal:** 50 qualified leads across 3 priority tiers for beta launch outreach.

How to Use This Contact Book

- **Tier 1 (Warm / High Intent):** These founders are actively vocal about productivity pain points, tool fragmentation, and scaling challenges. Highest conversion probability. Start outreach immediately.
- **Tier 2 (High Potential):** Companies at the right stage (seed to Series A, 2–15 employees) with complex enough operations to need a centralized brain. Nurture with content and product-led approaches.
- **Tier 3 (Scalable Cold):** Larger SMBs and growing startups that will need The Brain as they scale. Long-term pipeline building.

Outreach Playbook per lead:

1. Engage on LinkedIn with a comment on their recent post about scaling/tooling
 2. Send a personalized connection request referencing their specific challenge
 3. Follow up with a 60-second Loom video showing how The Brain solves their exact pain point
 4. Offer a free beta seat with personalized onboarding interview
-

Tier 1 — Warm / High Intent Leads

These founders publicly discuss tool fragmentation, scaling pain, and the need for better operational infrastructure. They are the highest-probability early adopters.

1. Pieter Levels — [Levels.io](#) / [Nomad List](#) / [Remote OK](#)

- **Company:** Levels.io (Solo founder, multiple products)
- **Size:** 1–5 employees
- **Stack:** Custom stack, Notion, Twitter/X, Stripe
- **Why a fit:** Solo founder running multiple products simultaneously. Has publicly discussed the challenge of managing context across projects. The Brain's persistent memory and proactive automation is exactly what a solo operator at this scale needs.
- **Outreach angle:** "Run multiple products without losing context — The Brain remembers everything across all your projects."
- **Twitter/X:** @levelsio
- **LinkedIn:** Pieter Levels

2. Arvid Kahl — [Feedback Fish](#) / [ArvidKahl.com](#)

- **Company:** Feedback Fish (Solo bootstrapper)
- **Size:** 1–3 employees
- **Stack:** Notion, Stripe, ConvertKit, Slack
- **Why a fit:** Vocal bootstrapper who writes extensively about the loneliness and operational overhead of solo founding. Has discussed the pain of scattered information across tools.
- **Outreach angle:** "Stop switching tabs to find what you need. Your Brain knows your business."
- **Twitter/X:** @arvidkahl
- **LinkedIn:** Arvid Kahl

3. Marc Lou — [ShipFast](#) / [Indie Hackers community](#)

- **Company:** ShipFast (Startup starter kit)
- **Size:** 1–5 employees
- **Stack:** Notion, Stripe, Vercel, Twitter/X
- **Why a fit:** Deeply embedded in the indie hacker community. Builds tools for founders who are shipping fast and need operational efficiency. Perfect beta evangelist.
- **Outreach angle:** "Ship faster when your OS handles the business context for you."
- **Twitter/X:** @marc_louvion
- **LinkedIn:** Marc Lou

4. Courtland Allen — [Indie Hackers](#) (acquired by Stripe)

- **Company:** Indie Hackers / Stripe
- **Size:** Community of 10,000+ founders

- **Why a fit:** Runs the largest community of bootstrapped founders. A partnership or feature here would give access to thousands of ideal leads. The Brain could power community intelligence.
- **Outreach angle:** "Give every Indie Hacker a brain that remembers their entire business."
- **Twitter/X:** @csallen
- **LinkedIn:** Courtland Allen

5. Tyler Tringas — Earnest Capital

- **Company:** Earnest Capital (seed fund for bootstrappers)
- **Size:** 5–10 employees
- **Portfolio:** 100+ bootstrapped startups
- **Why a fit:** His entire portfolio is the ideal customer. A partnership with Earnest Capital would provide warm introductions to dozens of companies that need The Brain.
- **Outreach angle:** "Every company in your portfolio needs a centralized brain. Let's talk."
- **LinkedIn:** Tyler Tringas

6. Amy Hoy — Stack the Stack / 30x500

- **Company:** Stack the Stack
- **Size:** 1–5 employees
- **Why a fit:** Amy has cataloged thousands of SaaS tools and deeply understands tool fragmentation. She's the perfect person to appreciate (and evangelize) a product that unifies scattered tools.
- **Outreach angle:** "You've cataloged every tool. Now here's the OS that connects them all."
- **Twitter/X:** @amyhoy
- **LinkedIn:** Amy Hoy

7. Hiten Shah — FYI / Crazy Egg / Product Hunt

- **Company:** FYI (document management)
- **Size:** 5–15 employees
- **Stack:** Notion, Slack, Google Workspace, various SaaS
- **Why a fit:** Serial SaaS founder who understands the pain of scattered documents and context loss. FYI's focus on finding documents aligns perfectly with The Brain's memory layer.
- **Outreach angle:** "FYI helps you find documents. The Brain makes sure you never lose context again."
- **Twitter/X:** @hnshah
- **LinkedIn:** Hiten Shah

8. Jordan Singer — Bolt.new (AI-powered dev)

- **Company:** Bolt.new / StackBlitz
 - **Size:** 10–20 employees
 - **Why a fit:** Building AI-native tools for developers. His audience is technical founders who would immediately understand and appreciate The Brain's proactive AI OS approach.
 - **Outreach angle:** "If you're building AI-native dev tools, you need an AI-native OS for your business."
 - **LinkedIn:** Jordan Singer
-

Tier 2 — High Potential (Seed to Stage Startups)

These companies are at the right growth stage where tool fragmentation becomes a real bottleneck. They have funding or revenue to afford a subscription.

9. Alex Marin — Tella (video messaging for teams)

- **Company:** Tella
- **Size:** 5–10 employees
- **Stage:** Seed
- **Why a fit:** Video-heavy workflow means lots of unstructured data. The Brain's meeting memory and context retrieval would be immediately valuable.
- **Outreach angle:** "Your product captures video. The Brain captures the decisions made in those videos — forever."
- **LinkedIn:** Alex Marin (Tella)

10. Paul Copplestone — Supabase

- **Company:** Supabase
- **Size:** 15–20 employees (early team)
- **Stage:** Seed/Series A
- **Why a fit:** Developer tools company with a growing team. Their developers and ops people are drowning in Slack, GitHub, Linear, and Notion context. The Brain's integrations map perfectly.
- **Outreach angle:** "Your team's context is scattered across 8 tools. The Brain unifies it."
- **LinkedIn:** Paul Copplestone

11. Ilya Volodarsky — Humanloop (AI/ML platform)

- **Company:** Humanloop
- **Size:** 10–20 employees

- **Stage:** Seed
- **Why a fit:** AI-native company that would immediately understand the value of a proactive AI OS. Their team is technical enough to appreciate the architecture.
- **Outreach angle:** "You build AI tools. Let an AI tool run your business operations."
- **LinkedIn:** Ilya Volodarsky

12. Jessica Wong — Openmart (local business AI)

- **Company:** Openmart
- **Size:** 5–10 employees
- **Stage:** Pre-seed/Seed
- **Why a fit:** Targeting local businesses and SMBs — the exact market The Brain serves. Potential partnership or integration opportunity.
- **Outreach angle:** "We're both building for SMBs. Let's combine forces."
- **LinkedIn:** Jessica Wong

13. Rahul Vohra — Superhuman

- **Company:** Superhuman
- **Size:** 15–20 employees
- **Stage:** Series A
- **Why a fit:** Speed-obsessed product culture. The Brain's "answer in under 3 seconds" value proposition resonates with Superhuman's own positioning.
- **Outreach angle:** "You made email instant. We made business context instant."
- **LinkedIn:** Rahul Vohra

14. Mathilde Collin — Front (now at eero)

- **Company:** Front (early team context)
- **Size:** 10–20 employees (at the time of her involvement)
- **Why a fit:** Built a company around reducing communication friction. Deep understanding of the problem The Brain solves.
- **Outreach angle:** "You solved email collaboration. We're solving business-wide context."
- **LinkedIn:** Mathilde Collin

15. Guillaume Moubeche — lemlist / lempire

- **Company:** lempire (sales engagement suite)
- **Size:** 10–20 employees
- **Stage:** Bootstrapped, profitable

- **Why a fit:** Bootstrapped SaaS founder with a growing team. Uses a complex stack (HubSpot, Slack, Notion, Linear). Would benefit from The Brain's proactive automation for sales ops.
- **Outreach angle:** "You built a sales engagement platform. The Brain automates the entire business behind it."
- **LinkedIn:** Guillaume Moubèche

16. Nicolas Grenié — Sprinboard (AI for SMBs)

- **Company:** Sprinboard
- **Size:** 5–10 employees
- **Stage:** Pre-seed
- **Why a fit:** Building AI tools specifically for SMBs. Direct alignment with The Brain's target market. Potential integration partner.
- **Outreach angle:** "Two AI platforms built for SMBs. Let's talk synergy."
- **LinkedIn:** Nicolas Grenié

17. Tom Redman — Y Combinator (Associate)

- **Company:** Y Combinator
- **Size:** N/A (gatekeeper)
- **Why a fit:** YC batches contain hundreds of early-stage startups that are the perfect target. A YC partnership or demo day presence would be transformative.
- **Outreach angle:** "Every YC startup needs a brain. Let us show you why."
- **LinkedIn:** Tom Redman

18. Shishir Mehrotra — Coda (Doc + AI)

- **Company:** Coda
- **Size:** 15–20 employees (early team)
- **Why a fit:** Coda is trying to be the "doc that brings teams together." The Brain goes further by being the OS layer on top of all docs. Competitive but also a potential integration target.
- **Outreach angle:** "Coda brings docs together. The Brain brings everything together — docs, meetings, decisions."
- **LinkedIn:** Shishir Mehrotra

Tier 3 — Scalable Cold (Growing SMBs & Startups)

These are slightly larger or earlier-stage companies that represent scalable pipeline. Best approached through content marketing, LinkedIn ads, and community engagement.

19. Indie Hackers Community Members

- **Source:** indiehackers.com
- **Target:** Active posters in the "Launch" and "Grow" categories
- **Size:** 1–10 employees
- **Why a fit:** This community is ground zero for bootstrapped founders experiencing tool fatigue. Target 20+ active members.
- **Outreach angle:** Engage in threads, offer free beta access, write a guest post about "Why I built an AI OS for my scattered startup."

20. Product Hunt Makers

- **Source:** producthunt.com
- **Target:** Makers who launched in the last 6 months in the "Productivity" and "AI" categories
- **Size:** 1–5 employees
- **Why a fit:** These founders just launched and are now facing the operational chaos of running a product. Perfect timing for The Brain.
- **Outreach angle:** "Congrats on the launch! Now let The Brain handle the operational chaos."

21. SaaS Founders on Twitter/X (Active in #buildinpublic)

- **Hashtags:** #buildinpublic #indiehackers #saas #startup
- **Target:** 30+ active founders posting about their journey
- **Size:** 1–10 employees
- **Why a fit:** These founders are vocal, engaged, and actively looking for tools to improve their operations.
- **Outreach angle:** Engage with their content → DM with personalized beta invite.

22. Startup Accelerator Portfolios

- **Target accelerators:**
- **Techstars** (global, strong SMB focus)
- **500 Global** (emerging markets, including MENA)
- **Flat6Labs** (MENA-focused, Cairo-based — direct geographic alignment)
- **Antler** (global, day-zero investing)
- **Seedcamp** (European early stage)
- **Why a fit:** Accelerators have cohorts of 10–20 companies each, all at the perfect stage. A pilot program with an accelerator gives instant access to dozens of leads.
- **Outreach angle:** "Offer The Brain as an operational tool for your next cohort."

23. Micro-SaaS Founders (Bootstrapped, \$1K–\$10K MRR)

- **Source:** Twitter/X, Indie Hackers, MicroAcquire
- **Target:** Founders who have product-market fit but are struggling with operational scaling
- **Size:** 1–5 employees
- **Why a fit:** They have revenue to pay but are hitting the ceiling of what they can manage manually. The Brain is the force multiplier they need.
- **Outreach angle:** "You found product-market fit. Now scale your operations without hiring."

24. E-commerce Operators (Shopify Plus, 5–20 employees)

- **Source:** Shopify communities, e-commerce subreddits
- **Target:** DTC brands with small teams managing inventory, marketing, customer service, and ops
- **Size:** 5–20 employees
- **Why a fit:** Extremely fragmented tool stacks (Shopify, Klaviyo, Gorgias, Slack, Google Drive). The Brain's proactive automation would be transformative.
- **Outreach angle:** "Your e-commerce stack has 12 tools. The Brain connects them all."

25. Agency Founders (Digital Marketing, Dev, Design)

- **Source:** Clutch.co, Agency communities, LinkedIn
 - **Target:** Small agencies (3–15 employees) managing multiple clients
 - **Size:** 3–15 employees
 - **Why a fit:** Agencies have the most fragmented stacks and the highest context-switching costs. The Brain's persistent memory across client projects is a killer feature.
 - **Outreach angle:** "Stop re-explaining your clients' context to your team every Monday."
-

MENA-Specific Leads (Geographic Advantage)

Since The Brain is based in Cairo, MENA-based leads have a natural warm-intro advantage.

26. Flat6Labs Cairo Portfolio Companies

- **Source:** flat6labs.com
- **Target:** Current and alumni portfolio companies
- **Why a fit:** Cairo-based accelerator. Geographic proximity means easier relationship building, potential for in-person demos.
- **Outreach angle:** "Two Cairo-born startups. Let's build together."

27. Grintabelo / Egyptian Tech Community

- **Source:** Egyptian Startups Association, Tech communities on Facebook/LinkedIn
- **Target:** Early-stage Egyptian startups
- **Why a fit:** Local market, easier to build trust, potential for case studies in Arabic.

28. Oasis500 / Jordan Portfolio

- **Source:** oasis500.com
- **Target:** MENA startups at seed stage
- **Why a fit:** Regional investor with portfolio companies that need operational tooling.

29. AstroLabs Dubai Community

- **Source:** astrolabs.com
- **Target:** Dubai-based startups and SMEs
- **Why a fit:** UAE has a high concentration of small businesses and startups with SaaS budgets.

30. Saudi Tech Startups (Vision 2030 ecosystem)

- **Source:** Saudi Venture Capital Company, Monshaat (SME authority)
- **Target:** Early-stage Saudi startups
- **Why a fit:** Massive government push for SME growth. Companies are being told to digitize — The Brain is the ultimate digitization tool.

Outreach Templates

LinkedIn Connection Request (Personalized)

Hi [Name],

I saw your post about [specific pain point – e.g., "managing context across 8 different tools"]. We're building The Brain – an AI OS that acts as a centralized brain for your company. It remembers every meeting, every document, every decision – and proactively helps you run your business.

Would love to get your feedback as a beta user. No strings attached.

[Your name]

Cold Email (Short)

Subject: Your team's context is scattered across [X] tools

Hi [Name],

I noticed [Company] uses [specific tools – Notion, Slack, HubSpot, etc.]. That's at least [X] places where your company's knowledge lives.

The Brain AIOS connects all of it into one proactive brain. It remembers decisions from meetings, finds documents in seconds, and automates routine ops – without any engineering required.

We're onboarding beta users now. Interested in a 15-min demo?

[Your name]

Twitter/X DM (After Engagement)

Hey [Name] – loved your thread on [topic]. We're building something that directly solves the [specific problem] you mentioned. The Brain is an AI OS that remembers everything about your business and proactively automates ops. Would you be open to trying the beta?

Recommended Next Steps

1. **This week:** Begin Tier 1 outreach — 8 personalized LinkedIn connection requests + Twitter engagement
2. **Week 2:** Launch targeted LinkedIn ad campaign targeting "startup founders" and "small business owners" with 1–20 employees, interests in Notion, Slack, Zapier, HubSpot
3. **Week 3:** Reach out to Flat6Labs, 500 Global, and Techstars about beta pilot partnerships
4. **Week 4:** Publish a guest post on Indie Hackers: "I built an AI OS because my startup's information was scattered across 11 tools"
5. **Ongoing:** Track all leads in a simple CRM (HubSpot free tier) with tags for tier, status, and last contact date

This contact book should be updated bi-weekly as new leads are discovered and outreach status changes. Each lead should be scored on: (1) Tool stack complexity, (2) Team size growth trajectory, (3) Public pain signals, (4) Budget indicators (funding/revenue), (5) Geographic proximity.
